

DCBS Number: [Redacted]  
DCBS Name: [Redacted]

DPP-1276  
Revised 07/03

**VI. Discuss specific needs a relative may have for startup costs:**

Furniture, supplies, bedding, games and toys would need to be purchased.

**VII. [Redacted]**

There are concerns regarding the ability of the adults to parent three children age 3 and under.

If so, describe concerns.

The lack of parenting experience on the part of each adult is an area of concern.

- ✓ Does the relative have resources and the willingness to use them that are necessary to lessen or remove the area(s) that are of concern?  
Both adults have expressed a willingness to complete parenting classes
- ✓ Are there community resources for support of the child's placement in the relative's home?  
Child Care is available close to the residence.

**VIII. Evaluation and Recommendation:**

What is your overall assessment of this relative as a potential care provider?

→ This relative, although well meaning, may not possess the ability to parent three children aged three and under. The relationship and roles of the two adults are fraught with the possibility of long term illness/disabilities and domestic violence.

[Redacted] the infant sharing a room with two adult males is another concern.

[Redacted]

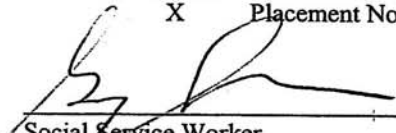

[Redacted]

The experience of caring for three children, age three and under is very problematic. The fact that one of the caregivers is a non-relative is a concern for this placement.

What actions do you recommend others take to provide a stable placement for this child?

Stable placement for these children would best be addresses by continued placement in Foster Care.
